

Partnership Announcement

between

**Lions Clubs
International**
MD105 British Isles

and

**Brain Tumour
Research**

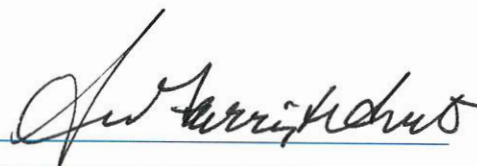

We agree today an initial four year fundraising partnership, during which time Lions Clubs International of the British Isles, will endeavour to raise a minimum of £1,000,000 for the Brain Tumour Research charity, upon which an individual laboratory within the wider facility of one of the charity's dedicated Research Centres will be named for Lions Clubs International in order to create a lasting legacy.

Both parties will meet to agree a final strategy and finite detail in the coming weeks that follow the signing of this important stepping stone, that recognises this exciting collaboration. The governing document that arises will be subject to change by either party within an agreed timeframe .

Brain Tumours are indiscriminate. What's more, they kill more children and adults under the age of 40 than any other cancer. Together, we are determined to change this through a partnership to positively impact and improve the lives of children affected by brain tumours.
